Recruitment & Vetting

Finance & Procurement

Managing talent acquisition to meet the demand

With our innovative approach to recruitment - including using Virtual Reality, Artificial Intelligence and Digital Vetting - SSCL can support all recruitment requirements, from business as usual services right through to even the most challenging high volume recruitment campaigns.

We don't just manage internal and external recruitment such as checking references, issuing contracts and post-recruitment services; we are also constantly looking for innovative new ways to speed up processes and make our approach even more cost effective, quick and efficient.

Keeping finance & procurement in safe hands

SSCL provides a complete Finance & Accounting service, giving clients more control and improved management information to support better decision-making.

Whether financial accounting, invoicing, debt collection or providing high quality business intelligence, we provide a holistic approach.

Our Procurement Team combines commercial expertise with extensive public sector experience to maximise the buying power that comes with economies of scale – achieving better value and saving money.

SSCL is a unique joint venture between the Cabinet Office and Sopra Steria. We bring together the best of public and private sector ways of working to transform services and provide better value for the UK taxpayer.

HR & Payroll

Customer Contact Centre

Taking care of any business's most valuable asset: its people

SSCL provides a wide range of HR and payroll services to meet the complex requirements of our large Government and Police clients.

We handle everything from attendance management and disciplinary support services, all the way through to providing high quality management reporting.

Our experienced team delivers accurate payroll administration, including a comprehensive range of voluntary deductions and pension schemes. We also process a wide range of allowances, advances, special payments and expenses.

Providing high quality contact centre services

SSCL is continually investing in technology to make it easier and more convenient to self-serve using our Single Operating Platform which has been developed specially for our public sector clients.

However, due to the sensitive and complex nature of what we do, our Customer Contact Centre is also on hand to support people with any queries, guidance or issues.

In addition to supporting employees from client organisations, the Customer Contact Centre also has teams managing specific services for our clients; for example, we manage the switchboard for over 100 prisons.

Did you know that every year SSCL..

Provides services to over **300K** customers

Pays over **260K** public sector employees
